3. Go to <https://app.uniswap.org/#/uni>, make sure to visit the legitimate Uniswap Website.

The screenshot shows the Uniswap website interface. At the top, there is a navigation bar with links for Swap, Pool, UNI, Vote, and Charts. On the right side of the navigation bar, there is a UNI token icon, a 'Connect to a wallet' button, and a settings gear icon. The main content area features a blue box titled 'Uniswap liquidity mining' with the text: 'Deposit your Liquidity Provider tokens to receive UNI, the Uniswap protocol governance token.' Below this is a link 'Read more about UNI'. Underneath, there is a section for 'Participating pools' with a timer 'Rewards end in 1:08:52:48'. Two pools are listed: 'ETH-DAI' and 'ETH-USDC'. The ETH-DAI pool shows 'Total deposited' as '\$363,511,123' and 'Pool rate' as '583,333 UNI / week'. Both pools have a 'Deposit' button.

4. Deposit Liquidity available from Kanva Participating Pools to get a Uniswap LP Token

 ETH-DAI	Deposit
Total deposited	\$375,394,282
Pool rate	583,333 UNI / week
 ETH-USDC	Deposit
Total deposited	\$584,535,938
Pool rate	583,333 UNI / week
 ETH-USDT	Deposit
Total deposited	\$508,817,865
Pool rate	583,333 UNI / week
 ETH-WBTC	Deposit
Total deposited	\$888,363,637
Pool rate	583,333 UNI / week

6.1 Enter the amount of LP Tokens, then click "Deposit"

KNV/ETH pool

Staking KNV/ETH-UNIV2-LP tokens in the KNV/ETH pool earns you roughly x7 KNV compared to other pools. You could also earn five palette points(max) per day. With enough Palette points, you can mint an exclusive NFT. Supply and palettes required are different across NFTs.

Your deposit: **500** KNV/ETH-UNIV2-LP
